

THIN ROTOR HEAT WHEELS

Unique AUSTRALIAN Mylar heat wheels with 10cm thin rotors, delivering 90% real, balanced flow heat/cooling recycling with negligible carryover and proven decades long life even in aquatic centres, to provide freely air-conditioned building fresh air.

Developed by CSIRO & Monash University

Australias' top Sportsmen, Politicians & Consultants designing Greener Energy Sustainable Buildings, benefiting from Australias' Wheel Heat Recovery for decades.

A TOP 30 AUSTRALIAN CLEAN TECH COMPANY IN 2012
